

## Accounts Payable

Effective cash management requires speed and accuracy in dealing with Suppliers.

It is surprising how often the most simple mistakes, such as paying a supplier twice, can lead to unnecessary or even irrecoverable cash outflows.

Offshoring allows you to apply superior controls which would not be cost effective in the UK at little or no extra cost. By leveraging KS Arcis's offshore centres to deliver enhanced controls at a lesser cost you can concentrate on the value added in managing the cash outflow.
